

SLIDE 1 From page 73

- Since the late 1970s, **ISRAEL** has repeatedly saved the United States from pending destruction.
 - 1970s, saved us from already-inserted Spetznaz teams with nuclear weapons, who would have blown up our cities.
 - 1986, saved us from pending Soviet attack with energetics weapons, particularly scalar interferometers.
 - 1997, saved us from Soviet attack twice, which would have been attacks by the full energetics weapons arsenal.
 - 1999-2000, destroyed millions of nonmaterial robots in subspace inside EM signals, fields, and potentials throughout the U.S.
 - Presently, attack is again scheduled, with addition of the eerie new mind conversion techniques of mind war.
- **ISRAEL** may be able to save us once again, in which case we shall survive. Otherwise, we will be destroyed, beginning about two years from now.

SLIDE BRIEFING - 520 SLIDES (no room to include here)

OBLIVION - AMERICA AT THE BRINK

Including Scalar Electromagnetic Weapons and their Terrorist Uses

This book is an expanded version of a very **CLOSE-HOLD** brief provided to a certain Head of State and his Foreign Minister in 2003

ISBN: 0-9725146-2-7
 First edition Oct. 13, 2004
 Drafted Sept. 11, 2004 on the Third Anniversary of 9/11/01
 Revised and updated 23 April 2005
 Cheniere Press Santa Barbara, California 93109,

New book by Tom Bearden details the uses and abuses of scalar electromagnetics, from energy applications to weather modification.

This book is an expanded and updated version of a **Close Hold** briefing given to the Head of State and Foreign Minister of a **friendly nation*** in 2003. by **Anthony Craddock**

See p. 4 this leaflet for identity

"Oblivion - America at the Brink" is **Tom Bearden's** most comprehensive overview to date detailing the uses and abuses of scalar electromagnetics. The product of

T. E. THOMAS E BEARDEN , LT, COL. US ARMY (RETIRED)

both his deep military experience and his penetrating insight into the realms of advanced physics, this book presents its frightening conclusions in Tom's unique hard-hitting style.

"Oblivion - America at the Brink", published by Tom's Cheniere Press, is now available.

A disturbing new area of **PSYCHOENERGETICS** — "mind wars" — that completely overturns the strategic landscape, came to Tom Bearden's attention two years ago.

Cold War Development of Scalar Interferometry

Extract: Chapter 1 pages 1-2 + 1st Slide from page73

Prior to 1990, the weather over North America was being steadily engineered by the KGB - particularly beginning on July 4, 1976 - using giant strategic scalar interferometers on site in Russia {i, ii, iii, iv}. From the beginning of the development program which started shortly after WW II, the KGB personally controlled the development of startling new Russian weapons under the Soviet energetics program {v, vi, vii}. That program was for the research and eventual

development of highly advanced new superweapons more powerful than the atomic bomb.

The new superweapons were developed, produced, manned, and operated by the KGB itself, and were never placed in the hands of the regular Russian armed forces. Speaking to the Presidium in 1960, Khrushchev referred to the forthcoming scalar interferometer weapons with the following statement:

"We have a new weapon - just within the portfolio of our scientists, so to speak - so powerful that, if unrestrainedly use, it could wipe out all life on earth."

The large Soviet strategic scalar interferometers were deployed and became operational in April 1963 - a bit too late for use by Khrushchev to counter the U.S. confrontation in the Cuban Missile Crisis of latter 1962. However, the first operational weapon was used to destroy the U.S.S. Thresher nuclear submarine while on underwater maneuvers off the East Coast of the United States, in April 1963. Thereby Khrushchev demonstrated the power of his new weapons over nuclear submarines - one of the major three elements of the strategic military nuclear firepower of the United States. Extension to the other two elements intercontinental ballistic missiles (ICBMs) and strategic bombers - was obvious.

Intro:Cont'd from p.1

Realizing the dreadful implications, he immediately prepared a Very Close Hold briefing for the Head of State and Foreign Minister of the only nation capable of possibly countering this new menace to humanity's survival. Lavishly illustrated with over 500 slides, "Oblivion" is a must-read for everyone interested in the future of humanity and the survival of the United States, and is equally essential reading for military, scientific and strategic planners. And politicians.

Weather engineering, freezing time, precursor robot wars, the nature of mind, artificial life, mind conversion, EM disease propagation - these are all topics explained in this tour-de-force. It is not sci-fi or speculation, but is what is REALLY going on - today. You will not find this information anywhere else. 

Incidents Where Outside Intervention Saved the United States

Many dramatic but largely unheralded incidents occurred during the so-called "**Cold War**". For example, in the 1970s a small nation saved the United States from total destruction by Soviet nuclear weapons which had been inserted in our cities. That nation did it very simply: they likewise inserted an appreciable number of nuclear weapons of their own, some thermonuclear, inside Russia itself, in its population centers and its primary target zones.

All these inserted nuclear weapons - both in the United States and in Russia are still there with their activation teams, waiting. In such manner was the "**balance of terror**" - the Mutual Assured Destruction or MAD doctrine - really implemented and enforced vis it vis the Soviet Union. At the time this approach to deterrence was called "**Dead Man Fuzing**".

In April 1986 a private little U.S.'group intervened to prevent a forthcoming giant earthquake that was being built up for the greater Los Angeles and San Francisco areas by the KGB scalar interferometers. Via a special electronic device, the group suddenly destroyed one of the distant **Soviet scalar interferometer transmitters** thereby initiating the nearby Chernobyl nuclear incident but preventing the loss of perhaps 200,000 U.S. lives in Los Angeles and San Francisco, together with preventing terrible destruction and economic damage.

Also in 1986, the same friendly little nation again prevented our strategic destruction by even more powerful energetics weapons developed by the Soviet Union. As early as 1984, the **FRIENDLY NATION*** (cf p.4) simply began exploding very large Russian missile ammunition storage sites, to warn the Soviet Union of what was in store for it, if it attacked.

In 1997, again the U.S. would have been utterly destroyed on two occasions had it not been for the same **LITTLE NATION*** (cf p.4). Several professional colleagues and I played a desperate role in both of those frighteningly real incidents, which were never reported in the news media. Indeed, our own intelligence agencies had no inkling that a full strategic Soviet superweapon attack to destroy the United States was imminent on each of the occasions (the second of which would have occurred on May 1, 1997) ^(viii). The May Day attack for 1997 would have been the "big one", had the Federal Security Service (FSB/KGB) not been checkmated by "an offer it could not refuse" - delivered once again by the friendly nation. During those critical periods when every hour on the clock seemed a week in length, the hostile armada that would have struck us included the Japanese Yakuza and Aum Shinrikyo teams on site in Russia, operating leased KGB/FSB strategic scalar interferometers against the U.S.
