IT IS ALL COMING TO A HEAD!

Like a nasty boil the New World Order global conquest is coming to a head.

Soon it will explode, plunging

our world into a socialistic, Luciferian nightmare. Despatch seeks simply to alert our readers, there is no turning back this monstrosity. Keep always in mind that God Almighty is not mocked, He has warned us through Scriptural prophecy about this period of evil, **CONT'D. PAGE 4**

Florida Researcher)

THE GULF OF MEXICO OIL DISASTER

Aussie Researcher Comments

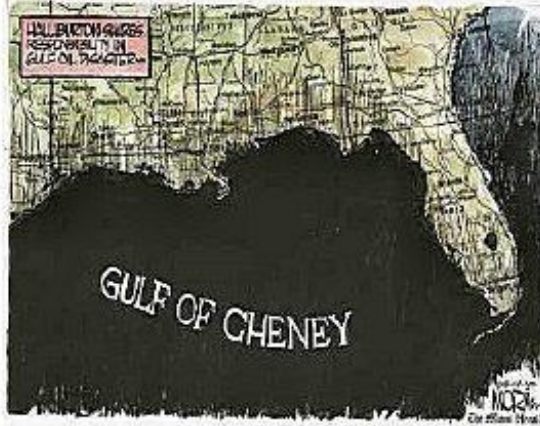

DESPATCH: **Laurie Addison** our independent Researcher has added his comments and research to this section.

The current situation re the oil fiasco being played out in the Gulf of Mexico is taking some rather interesting turns that seem to be associated with other things going on.

FIRST on the agenda is that the whole issue is now shaping up to be another deliberately concocted disaster cooked up by the usual

- Military Industrial Complex,
- Disaster Capitalism,
- Financial & Bankers conglomerate
- the Royals combined, AKA - the mob.

We have seen so many videos; read so many articles that it is hard to even keep track of the volume of information coming forth as this thing unfolds. This one is likely to pale even 9-11 because the long term Environmental damage and ramifications are yet to be known. The following streams of information in this article are intended **NOT** so much to draw conclusions at this point, but rather to take note of the different information and watch accordingly

to see where the bigger picture is heading.

The best précis I have seen on the current oil fiasco is the article written by **Dr. Len Horowitz** and is a good starting point. Please read the following before continuing.

(or send for it if you have no web access.)

www.rense.com/general91/guf.htm

Now that you have digested that, further info on the BP CEO **Peter Sutherland** can be seen at -

www.newswithviews.com/Weeks/darren111.htm

Make sure to click on 2009bio in the article

I guess you might say he's one of the boys.

Relevant sections have been placed in Despatch this issue pp. 7-9

(2 Timothy 3:1-5).

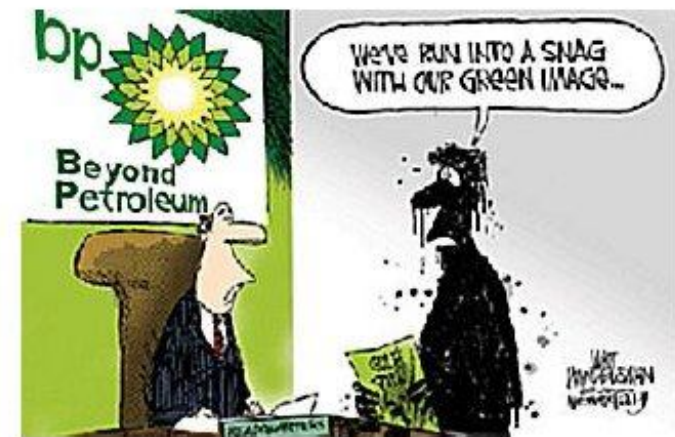

"This know also, that in the last days perilous times shall come. For men shall be lovers of their own selves, covetous, boasters, proud, blasphemers, disobedient to parents, unthankful, unholy, Without natural affection, trucebreakers, false accusers, incontinent, fierce, despisers of those that are good, Traitors, heady, highminded, lovers of pleasures more than lovers of God; Having a form of godliness, but denying the power thereof: from such turn away."

[www.youtube.com/
watch?v=LKW862_h-W4](http://www.youtube.com/watch?v=LKW862_h-W4)

With all this oil drama the call might go out that we need to be less dependent on oil - it's too dangerous. This of course would be music to the ears of

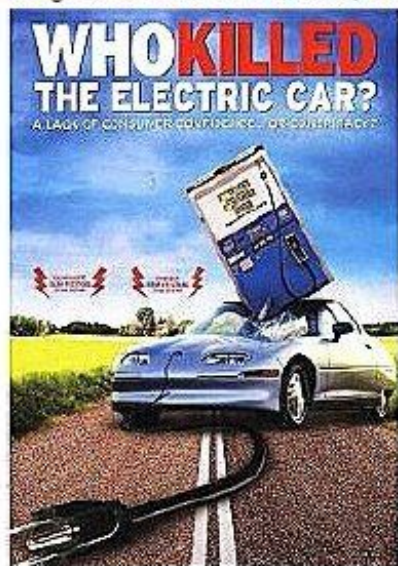

the Environmentalists. The current Gulf of Mexico fiasco, if it was indeed deliberate, is the classic catalyst to the winding down of the oil industry by the mob while still controlling and profiting from what will be left of it. Having made countless billions out of the Global oil industry, those who control it would not be particularly concerned if oil production was reduced to a bare minimum. This would be done to show their conformity to the Environmental agenda, as good NWO citizens would. Bearing in mind that oil is used to make something like another 2,500 other products it would continue to be used in the less polluting form of manufacturing said 2500 other products. It may well be that the newer forms of energy which have been developed would be the NEW bonanza to be exploited on a Global scale.

When General Motors released the EV1 electric car in 1996 it was very successful and those people who were fortunate enough to lease one were extremely happy with them. Several other companies also began making electric cars, and then suddenly the companies began withdrawing them and only Toyota sold a couple of hundred. They were commuter cars and could be recharged at recharging stations or overnight at home. The power for recharging came generally from coal fired power stations. I would suggest that GMH jumped the gun by releasing the electric car too soon or perhaps they were a type of test case as once again electric cars are being made in America. The DVD *"WHO KILLED THE ELECTRIC CAR"* makes excellent viewing in the light of the Global Warming fraud!

As oil and coal are the main targets for reduction, this would leave

a gaping hole in the requirements for transport and electricity. How then do we get around this? Firstly the requirement for transport is likewise to be drastically reduced by the implementation of U.N. AGENDA 21 with its compact living and closeness of local work. This would negate the need for the use of vehicles by the ordinary person and the freedom to travel where one would like too. The "Going Home" scene in the 1973 movie "Soylent Green", where Sol is on the "termination" table, actually a sacrifice on an altar with two priests, is a hint of the life under Agenda 21. It isn't until he is on his termination deathbed that Sol gets to see the marvels of creation, the places and things he's never seen before, all

Email: despatch@mail.cth.com.au Web Site: <http://www.despatch.cth.com.au/>

the beauties of the world projected on large screens around him, thus indicating that where you are born is where you work and die - no travel - a feudal slave. The earth is the cherry of the mega-rich Global Elitists and one reason why the Rudd government suggested some time back that the entire coastline of Australia for a distance of 500 meters from the shore would revert back to government ownership in about thirty years' time.

So along with the

- newly generated Security industry,
- planned mandatory Pharma industry,
- the Emissions Trading Scheme, an infinitely bigger scam and fraud than the U.S. Federal Reserve Bank,
- there will be new energy industries.
- First is the likely expansion of the nuclear industry.

In Australia for instance, the Howard government was hinting at moving down this avenue and then the Rudd Government took over. The following article might put the issue in perspective -

THE PENNY DROPPED.

Lynn Stanfield. 27 Nov, 2009

Today, I had an extraordinary experience. I was mulling through in my mind, all of the various driving

RUSSIA & M.E. Cont'd from p. 63

than it has been since the time of Perestroika," Nikonov said. *"Russia has started to react to the more cooperative policy from the West."*

Friendly relations with America and Europe, Syria and Iran, not to mention China, are all well and good, but Russia has been leaving one extremely important country out of the circle of peace and cooperation: Israel. Instead, Israel faces a host of antagonism from around the world. President Obama has expressed support for Israel, but it is clear that Israel-US relations are not as warm as they have been in the past. The world's willingness to turn against Israel may eventually leave the small Jewish nation alone in a sea of Islam - alone except for the protective power of God Almighty. 

ADVENTISM Cont'd from page 38

- The doctrine that the dead do not exist; they do not go to be with the Lord.
- The printing and continuing promotion of The Clear Word, a Bible paraphrase containing Ellen White's theology inserted into the texts.

• Deceptive practices:

- including misleading Walter Martin,
- concealing their identity in public evangelism,
- proselytizing Christians,
- pastors and administrators who

privately disbelieve many Adventist doctrines yet must present a public image of complete loyalty for fear of losing their influence and livelihood and creating a crisis among the laity.

This book will help Evangelical pastors in knowing how to better minister to transitioning Adventists who may visit their church and help pastors to keep their own members from being caught in the enticing net of Adventist evangelism.

Dale Ratzlaff was a fourth-generation Adventist and Adventist pastor when he discovered that Adventist theology undermined the gospel.

He has authored FOUR books

Sabbath in Christ (438 pages)

Cultic Doctrine of seventh-day

Adventists (383 pages)

Truth Led Me Out (152 pages)

PREFACE:

We as former Adventists are often asked why we write material which appears to be attacking the Seventh-day Adventist Church. Many current Adventist leaders from all levels 

for manufacturing these anisotropic magnets had been transferred to China. **I cannot at this stage locate the reference again so this is subject to confirmation when possible.** Why I am so sure is because about two weeks after reading it a friend informed me that China is ceasing export of Neodymium (rare earth) magnets. This immediately clicked into place with Bearden's information. China is the world's biggest supplier and these magnets are the type used by many inventors as well as being essential to the computer industry for use in hard drives etc.

I do hold some reservations about the concept of "precursor engineering" however. Bearden makes references elsewhere in his correspondence that the Russians have been using it for many years. According to him, the Russians are able to use this technology to turn titanium metal into a liquid at room temperature and pour it into moulds for making the hulls of super strength Soviet submarines. This reminds me very much of the "metal" the terminator in the movie "Terminator 2" was made of. The movies contain many hints and secret messages (another article that needs to be written) if you are informed and alert. To me the subject of "precursor engineering" would bear a lot of investigation and would require more knowledgeable persons than I. Considering his credentials, Tom Bearden has been at

the cutting edge of technology for most of his life and his works should not be easily dismissed. Anybody desiring to learn more about electrical technologies, particularly how Maxwell's equation was greatly reduced and Heaviside's equation was deliberately corrupted at the instigation of financier J.P. Morgan, can look up Bearden's lists of correspondence at the following websites. It was the corrupted Heaviside - Lorentz equation that formed the basis of electrical theory used by the American Institute of Electrical Engineers and taught in all the Universities to this day!

 (Must read)

From the above strands it appears that China, which was deliberately made a superpower controlled through Corporations by **THE MOB**, is making a determined effort to acquire as many energy resources and technologies as possible. This is being aided and abetted by the socialist leaning governments of many western nations who have been and are simultaneously and ruthlessly repressing the introduction of non-polluting Free Energy systems by the Western world. 

forces which are at play, causing our Australian parliamentary representatives to be so contrary on the Emissions Trading Scheme (ETS) bills.

While listening to the debate in our Senate, on the hundred and forty or so amendments to the proposed (ETS) taxing scheme which is being pushed through before the Copenhagen conference, the 'dots' suddenly all joined up.

Let me first explain a few 'dots' which were there to be linked:

- Carbon Dioxide is NOT a pollutant, yet it is consistently mouthed as the bogey for 'Global Warming' or 'Climate Change'.
- Just about everything we do in life, emits some CO₂, so it is a sure bet for someone to make a lot of loot if there is a taxing system on this gas.
- I am firmly convinced, the hidden agenda for this 'sustainable energy' push, is based on causing all of our current fossil fuelled 'base-load' energy generating systems (Coal, Gas, Oil) to be made unviable and thus force an acceptance of Nuclear Power Generation.
- There is no doubting the tremendous amounts of money to be made by those who take advantage of investing in any 'Carbon Trading Schemes'.
- You know who are the most likely to take advantage of our country being subjected to any Carbon Trading Schemes.

You will also, surely, agree with me when I point out the current driving force behind the advancement of China into the 'money world of democracy' is the same certain 'mob' of money people who have taken control of USA, Europe, Japan etc. and now it is the 'China era' for investment and control.

- China has become one of the richest and most powerful 'money countries' ever, by clever design and manipulation. A few pieces of silver and a good time is all it takes.
- Our political personages have borrowed heavily from China; how difficult it will be for our country to resist Chinese investment in our resources (when you are in their debt, they control you).
- Already, we see China being granted permission and taking up ownership of the huge Uranium mining operations in the Woomera, Roxby Downs, Olympic Dam region of South Australia (please read my May 2009 essay 'Roaring Forties' which explains it all).
<http://loveforlife.com.au/content/09/09/25/roaring-forties-hands-all-those-who-got-their-share-uranium-laden-dust-over-last-fe>
 * Send for this is needed 26 pages
- You may agree with me in my speculations about our rather 'presidential style' leader, (ex) PM. K Rudd, who I believe was the 'chosen one' thrust upon us because of his close affiliations with China and his Mandarin speaking skills.

• Senator Penelope (Penny) Ying Yen Wong, has been given charge of the specially created portfolio called: Climate Change and Water.

If you have ever endeavoured to seek a parliamentary seat (as I have), you will know how costly and futile the exercise. Unless you are a 'chosen one' with funding and publicity to help out; either, some large multinational pastoral company or a large influential mining group or some multinational media corporation to back you, is essential for any success.

• One more 'dot' will do (there are many others); the multinational cabals and money controllers, back all 'chosen ones' almost equally. They are not concerned with who wins. As the poll is declared, they merely show up with their list of 'To-Do's' and expect obedience.

These 'dots' keep rolling around in my mind when I hear parliamentary 'debate' on 'bills' and I often wonder about where on earth the 'bills' get their origins.

For example, which constituent person or body of people in Australia, ever came up to their political representative and asked for the sale of Telstra?

Whoever, do you suppose, approached their member of the house of representatives and suggested we divest ourselves of our manufacturing and agricultural industries? Where is the Australian person who

romped up and said to parliament, "... let's privatise all of our utilities and hard won assets — give them to some overseas corporate companies and let them make the profits".

Of course, there is NOBODY. Yet, nothing which is decided in our Westminster System of Parliament should ever come to the table, unless it is the wish of the people.

All of these above mentioned parliamentary processes were undertaken at the behest of a sinister world body of corporate control people who are very cleverly achieving their ambition of owning and controlling everyone and everything in this world. Unfortunately and exasperatingly, it is all happening so easily. Mostly, the trick of a feel good 'treaty' or 'agreement' is the method used to outsmart our political minds.

Well, there we were, listening to the ABC News-radio direct broadcast of the ongoing stupidity; uninformed politicians arguing towards the establishment of an Emissions Trading Scheme for Australia, the latest in a long list of horrible New World Order control tricks.

The disorder in the house was particularly obvious and there was difficulty in making any coherent sense out of the debate; mostly, as usual, the 'debating' concentrated on slaughtering the messenger, instead of debating the topic with fact and truthful argument.

Suddenly, as if a bright light had been switched on, the penny dropped (if you'll pardon the pun). The 'dots' were joined.

The president of the chamber called on Senator Penelope (Penny) Ying Yen Wong, the minister for 'Climate Change and Water' to make some explanation.

As the minister began her address, the ABC announcer, in typical form, informed the listeners (us), of the name and station of the speaker. It went something like this: Mr acting president, I thank the member for babble, babble, babble ... Senator Wong, Labor, South Australia babble, babble, babble.

As I say, it hit me with the force of a brick, 'dots' just linked like crazy in my mind :

Penny Wong — Chinese; South Australia — where all the Uranium mines are; Uranium mines, now owned by China; Nuclear Power Stations — obvious outcome for successful Carbon Reduction and Emissions Trading Schemes and Sustainable Energy Planning; make the current base-load generation methods unviable and bingo! Uranium, Uranium, China, China, Money, Money, Climate Change, Climate Change, World Control, World Control.

Poor old Australia herded into the pen of debt to China and forced into accepting a Nuclear Power Generation scheme which was the

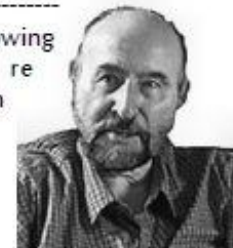

plan all along.

But, China is just a front. The real driving force behind the outrageous success of China in recent years is the 'Money Mob', the 'you-know-who' mob who has always run our lives.

The real beneficiaries of all of this 'Carbon Trading' and Nuclear Power generation will be **THE 'MOB'** who have cleverly planned it all, down to the last 'dot' and point. Yoo-Hoo, you-know-who I'm talking about. Why are you letting them do it so easily?? (End of Article)

• The following information re the production of

ANISOTROPIC PERMANENT MAGNETS

is the next dot to be joined. It is not my intention to debate the existence of FREE ENERGY here but to highlight yet another example where the "U.S. Dep't. Of Energy" has successfully blocked another invention which can produce FREE ENERGY. The information is at the following Tom Bearden site

www.cheniere.org/correspondence/021909.htm

When I was investigating this subject previously I am sure I came across a quote from **Bearden** where he also stated that the technology
