

by rabid environmentalists," he contends. "School children have been told that recycling is a matter of life and death. Businesses have been shut down. Valuable products like freon have been removed from the market. Chemicals and pesticides that helped to make this nation the safest and healthiest in the world are targeted for extinction."

DeWeese warns that the Climate Change Protocol is "a legally binding international treaty through which signing nations agree to cut back their energy emissions to 15 percent below 1990 levels." He insists that "it doesn't matter" if the final version is somewhat modified. "Such a massive disruption in the American economy, particularly since it has nothing to do with protecting the environment, will devastate this nation," DeWeese predicts. "To meet such drastically reduced energy standards will, in the short run, cost the United States over one million jobs."

DeWeese emphasizes that "only developed industrial nations will be bound by the treaty. Undeveloped Third World nations will be free to produce whatever they want. These will include China, India, Brazil, and Mexico," he observes, noting that "eighty-two percent of the projected emissions growth in coming years is from these countries." That fact alone proves that the Climate

Change Treaty is not designed to protect the environment. "The truth, of course," says DeWeese, "is that the treaty is really about redistribution of wealth," from America to the rest of the world.

Remember when we were supposed to be frightened because the world was getting colder? When that fraud was exposed, we then were told to beware of global warming. More and more people are now recognizing that this too is nonsense. So, what dread prospect will the conjurers of calamity con us with next? Will they try to stampede us into global governance by warning that the temperature will remain constant? No, that's not scary enough. Probably, what they will do is try to convince us that the earth is getting colder and warmer, simultaneously. After all, some of us might like it colder, some might like it hotter, but nobody likes it both ways at the same time.

AUSTRALIA, LAND OF THE NEW WORLD ORDER.

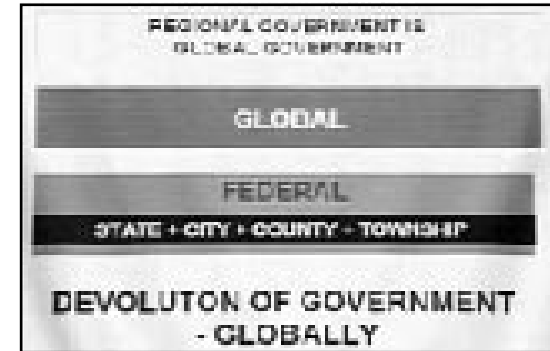

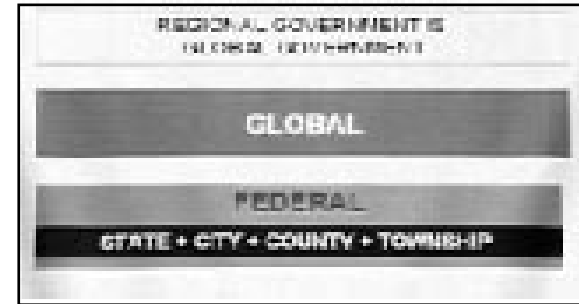

2006 has been a crisis year as far as the global government is concerned.

Events have happened thick and fast, yet few Australian citizens have information or enlightenment to realize what is going on here. If they are warned, they pull back and shut their ears, as though the mere mention of the New World Order is an offence to them. However, this is reality, not "theory", it is all happening now, we are under take-over from the global power-elite. *Despatch* magazine can only deal with a few of the events, these will be:

• **AL GORE, who is he and why has he been interfering in our affairs?**

- **How does this fit in with the recent visit by GORBACHEV?**
- **How does the G20 conference in Melbourne fit in?**
- The FRAUD of Climate Change and Global Warming,
- the deliberately engineered "drought" happening here –
- **where is all this heading?**

AL GORE & HIS AGENDA. Environmentalist Al Gore descending upon us was significant this year, soon after the visit of Gorbachev with his Green Cross foundation – all happening in 2006. We need to see from the beginning of this leaflet that the United Nations, the United Religions, the environment movement

AL GORE is working right along with Mikhail Gorbachev and the global government. He is not just a concerned environmentalist, as people imagine him to be. He is a part of a massive fraud to bring the peoples of the world under the total control of a heinous regime, already formed up, thousands of organizations and NGOs moving together in unison.

Who is Al Gore?

He is supposed to be a Baptist, but he is really a follower of the teachings of New Ager Teilhard de Chardin. Gore is a Pantheist, he believes that the earth is "Christ" and holds a "pan-Christify" doctrine that sees a mystical "Christ" and universe in a sort of spiritual compound. Chardin taught that the earth is Christ's body and soul. Because of these New Age beliefs, Gore worships the earth and nature, in the same way that those who see the earth as a Goddess, Gaia, worship the earth as "divine."

The Earth Charter was presented at the Earth Dialogues summit, major Keynote Speaker Mikhail Gorbachev, in Brisbane this year, 21-24 July held in the City Hall. This Earth Charter is being used as a Magna Charta for the earth, and when it is fully implemented will change every

law federally, statewide, right down to every local law in your own neighbourhood or street. N.W.O. leader Maurice Strong was also involved in the Green Cross Foundation, Earth Dialogues, Brisbane summit. The following quote will help the reader understand that all these New World Order men work together, using the environment as a way of bringing the citizens of planet earth under total control by the socialistic world government:

ON INTO 2007.

We are now entering 2007, the global government is changing everything in Australia, as well as the world at large, we can do nothing to stop it, it is all over bar the shouting.

Dennis Cuddy cited the following article, from 1999, appeared in USA Today, Dec. 8, by communitarian leader, Amihai Etzioni **"When Does Global Good Outweigh Our Own Sovereignty?"** Etzioni writes:

"One theme united many of the divergent groups that participated in the Battle in Seattle" last week: As they saw it, the United States was, again, sacrificing its sovereignty to satisfy yet another international organization. And President Clinton confirmed their worst suspicions when he stated that he was looking forward to the day when the World Trade Organization (WTO) would be able to impose sanctions upon nations.. The WTO is but one of a rising number of international organizations that are

stripping away our sovereignty. But should we fight them or embrace them as the forerunners of a new world order? . . . We are increasingly driven to recognize that we are entering an age in which our much-cherished sovereignty may have to be curtailed to serve global economic and humanitarian goals. . . . Competing in global markets led us to join NAFTA. The treaty allows a foreign corporation to haul an American one before a NAFTA tribunal. That tribunal's decisions are binding. . . . Nearly 100 people have been indicted or jailed in The Hague by the International Criminal Tribunal for the former Yugoslavia (ICTY). Thus, we are witnessing an army of one country arresting the citizens of another, in their homeland, and kidnapping them to stand trial in a third country, presided over by judges from still other countries. . . . In East Timor, we did not move until the United Nations sanctioned the action. . . . Putting our armed forces, even in a limited and temporary war, under a supranational command is a significant step toward a new world order, indeed one that may require amending our Constitution. . . . However, we had best recog-

nize that there is no way to stop globalism.”

End of Quote. The Globalists by Dennis Cuddy p. 257.

This 1994 quote shows that Al Gore has been pushing the global warming fraud for many years; **Michael S. Coffman** was shocked by Gore’s duplicity way back when he was Vice President of the United States:

“Some environmental leaders and politicians would have you believe that almost all scientists agree global warming is occurring. Vice President Albert Gore asserts that 98 percent of all atmospheric scientists agree that catastrophic greenhouse warming has begun. That is simply not true. A February 1992 Gallup poll of climatologists and atmospheric physicists yielded the conclusion that only 17 percent of these scientists believed there was scientific evidence for greenhouse-caused global warming. That means 83 percent believed there was no evidence for greenhouse warming. Further, nearly 60 percent believed that there was no evidence for any type of warming, though two-thirds thought that global warming was ‘possible.’

The most disappointing statistic of all emerging from this poll is that the media cite only 2 percent of these scientists – those with the worst predictions.” End of Quote. (“Saviors of the Earth?” p. 39).

In 2006-2007, the number of scientists opposing the myth of global warming has grown larger! Write for extra material on this, (includes booklet from last magazine) cost \$5 posted.

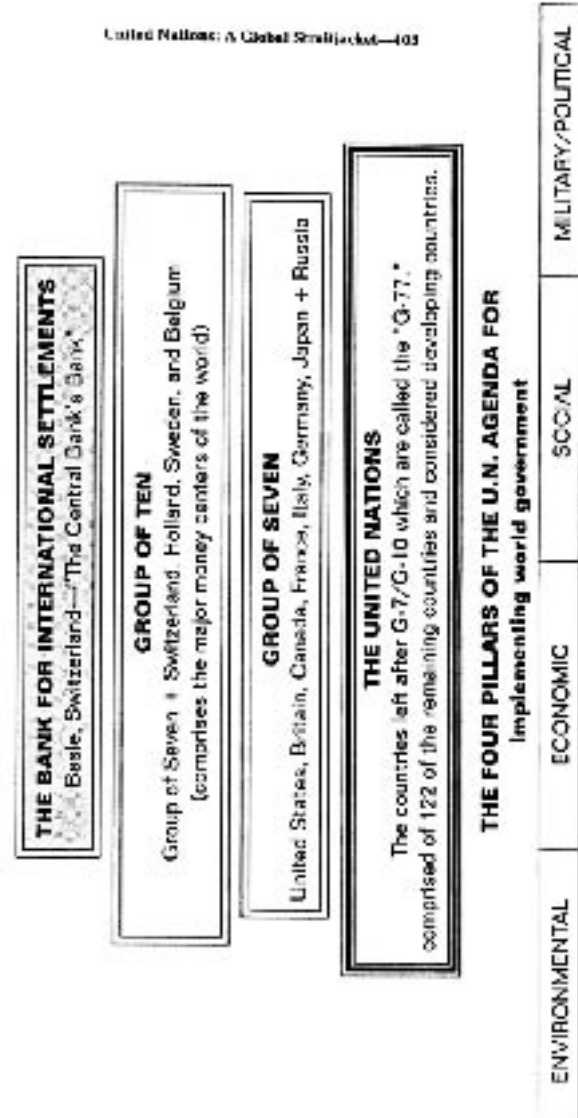

HOW DOES G20 FIT INTO THIS SCENARIO?

A Global meeting of importance was held in Australia, Melbourne, in November 2006. The G-20 (group of twenty) is a global union of central bank governors and finance ministers of 19 countries, plus the European Union which is also a member. The New World Order International Monetary Fund (IMF) and the World Bank, also participate in these meetings. The IMF is virtually a world central bank. G-20 was established on the initiative of G-7, now G-8, which is a union of top world leaders, under the global government. Its aims are global economic discussions and governance, international co-operation, international eco-

Global Warming Is Greatest Hoax Ever

"There is no global warming Period."
"Anyone who tells you that scientific research shows warming trends -- be they teachers, newscasters, Congressmen, Senators, Vice Presidents, or Presidents -- is wrong," writes Tom DeWeese of the American Policy Center in a recent issue of his DeWeese Report. "There is," he insists, "No Global Warming."

DeWeese calls global warming "the greatest hoax ever perpetrated on the people of the world, bar none. Those who have been fighting against the green agenda have been warning that modern-day environmentalism has nothing whatsoever to do with protecting the environment," he observes. "Rather, it is a political movement led by those who seek to control the world economies, dictate development, and redistribute the world's wealth."

DeWeese describes the relentless propaganda campaign that has been waged over the past couple of decades. "The American people have been assaulted from all directions

RIO+5

THE EARTH CHARTER

From March 13 to 19, 1997, world leaders would gather again in Rio to review the advancement of the '92 Earth Summit's initiatives over the previous five years. Aptly titled Rio+5, this gathering, hosted by the Earth Council and Green Cross International, would be a time for celebrating progress while fine-tuning UNCED's strategy for global government.

The first day's topic was "Assessing Past Performance and Future Prospects for a Sustainable Planet." This session analyzed the complete process of globalization, from United Nations programs and developments in financial institutions to the role of education and philanthropy. Speakers that day included Christopher Flavin from the Worldwatch Institute; Bella Abzug, a key player at the U.N. World Conference on Women in Beijing; and Wally N'Dow of the U.N. Centre on Human Settlements.

After a weekend of more meetings and consultations, Tuesday, March 18th, was entirely devoted to the subject of **"Global Governance."** Considered to be the high-point of the conference, this was a special time to address the on-going task of advancing spiritual, political, and ecological unity on a macro level.

Speakers included

- James Wolfensohn (previously) of the World Bank;
- James Gustave Speth of the United Nations Development Program;
- Lincoln Chen of the Rockefeller Foundation.
- Maurice Strong,
- Mikhail Gorbachev,

• & other influential world figures addressed the conference as well.

The most celebrated outcome of the Rio+5 meetings was the presentation of The **EARTH CHARTER**.

During his speech at the conference' Gorbachev again explained its significance:

"We have to set directions and act on planetary, national and individual levels. The main goal of the Earth Charter, the draft of which we adopted 18 March, 1997, is formation of a new outlook; a new set of values... . I admit that this document is far from being ideal. It is far from those 10 or 15 Commandments which we all know about and which have played their role for 2000 years. But here is the document which can be considered as an important step toward those famous testaments... . In its essence the Earth Charter shifts the focus to people on the Earth, their responsibilities, their morals and spirituality, their way of consumption. To save humankind and all future generations, we must save the Earth. By saving the Earth, humankind saves himself; it is that easy to understand! "

He continued:

"Both the Earth Council, Maurice Strong and we in the Green Cross feel the difficulties which we encounter, trying to implement ideas of radical changes in our everyday life, thus answering the challenge of the biosphere... .

We see the future as a cooperation of peoples, which implies a dialog of cultures, religions, traditions. We are trying to use this model as a cornerstone for the Earth Charter, in hope that we will create the document addressed to the Planet Earth... . Now we have a perfect chance to use our intellectual, moral and spiritual experience to answer the challenges of the next millennium."

Unfortunately, most people still do not realize that The Earth Charter has spiritual as well as political implications. Although it is being presented as a **Bill of Rights for mankind**, if implemented, "the environment" would have far greater rights than people. Humanity would literally become a slave to the earth and to the global regime enforcing these mandates.

much of how Hitler oppressed the population. **The Hitler Youth** proved to be most useful as will the Alliance Youth.

The AoC has said that they do not intend to ban religion, rather bring EVERY local-level religious organization under control of a central UN authority.

They also intend to introduce a "symbol" to advance their cause. I suspect I know where this one is going as the Alliance of Civilizations was formed to "represent a powerful response to those who feed on exclusion and arrogantly claim the sole ownership of truth."

This is none other than the foretold war on the saints. Further, there are two aspects to implementation of the AoC that caught my attention early on.

✚ First, the Alliance is being implemented by treaty. For the U.S. which is a signatory member of the OSCE

(Organization for Security and Co-operation of Europe, otherwise known as the Helsinki Process), the OSCE decisions are "**not legally but politically binding.**" The OSCE tells us what that means: member states are bound by treaty to implement

OSCE decisions WITHOUT THE NEED TO GAIN APPROVAL FROM THEIR LEGISLATURES.

✚ Second and more frightening is that the Alliance intends to implement through the **EU's Barcelona Process**. The OSCE has been incorporated into that process.

In 1995 when **Javier Solana** opened the Barcelona conference, he said that the foreign ministers were brought together to straighten out the "**clash of civilizations.**"

The Barcelona Process (also known as the **Euro-Mediterranean Partnership**)

is represented by the EU as the only platform that will bring peace and stability to the Mideast.

The social dimension of the process is being implemented through the **Anna Lindh Foundation (ALF)** which has also co-planned the Alliance of Civilizations.

Anna Lindh (Sweden's now deceased foreign minister) was "**anti-zionist.**" The ALF's foundational documents show that its intent is to combat **exclusivist ideologies** as well as TAKE OVER RELIGIOUS TRAINING.

This is consistent with the founding documents of the

CHILDREN ARE TARGETED.

All children in the global state will be taught only the environmental religion – love for Mother Earth, the earth's "divinity", and New Age Luciferian mysticism. All other religion will be against the law of the planet. Luciferian New Age leader, **Benjamin Crème** said this:
"Christianity and its churches ... will wither away slowly, as the people die out of them, as the new religion gains its adherents and exponents, and is gradually built by humanity."

This is happening now, the young are being taught from New Age Bible versions, by New Age pastors, with Rock music as an accompaniment. The older people in Bible-based churches are being pushed out into dwindling groups in little

halls, or in home fellowships. In her New Age classic, *Education for the New Age*, Alice Bailey of Lucis Trust, the darling guru of the United Nations, recommends that a child should be trained in the One World Mind "from its earliest breath." This is what Life-long Learning is all

Why is the timing interesting? It's interesting not only because there is a covenant with many and seven-year confirming program due to begin in 2007, but also because the EU is in deep crisis.

about, education for the New World citizen from birth until death.

Children were the main target of the *Earth Dialogues* from the Gorbachev Foundation, Brisbane 2006. 500 school children who were present at that conference were urged to Civil Disobedience if our politicians did not agree to the implementation of international law. *The Earth Charter* was presented, also an *Earth Charter* for children! This message, and much more, was broadcast live to ten thousand other young people, and multitudes of children in Australia since that time. The children of Australia are being told they are global citizens, and that the separated nation-state is not suitable for the New World in the 21st century. Fear for the environment is the main weapon used to send our children into a frenzy of dismay and into demanding that the world unify under the UN.

A giant presentation of Gorbachev and his exploits, shown on an overhead screen, dominated proceedings on Children's Day at City Hall, during the *Earth Dialogues*. In 1991 Dr. Dennis Cuddy, Ph.D, a former Senior Associate with the US Department

of Education, wrote with great foresight about Mikhail Gorbachev, he was not wrong:

"As this book is going to press, Mikhail Gorbachev has resigned as president of the now defunct U.S.S.R.. However, do not be surprised if in the future, like the symbolic 'phoenix rising from the ashes,' he returns to world dominance in some official capacity. Don't forget that in his December 7, 1988 speech to the U.N. General Assembly, he remarked: "The world economy is becoming a single entity outside of which no state can develop," and he called for "creating an altogether new mechanism for the furtherance of the world economy...a new structure of the international division of labor...a new type of industrial progress in accordance with the interests of all peoples and states....Further progress is now possible only through a quest for universal consensus in the movement toward a **new world order.**" (Emphasis added).
