

4 the health and well being of its very citizens. One might wish to research the corporatised entity, "Sydney Water" and see literally just who owns the rain that falls on the suburban home roof.

See **Despatch material re Public Private Partnership (PPP)**

From Macquarie Bank to the about to be floated **PrimeAg** rural behemoth, financial elite corporate farmers are buying out rural Australia, the future of this Nation is being written in paddocks, paddocks of hundreds of thousands of hectares per paddock. Surprise, surprise Peter Corish, ex National farmer's Federation President and ex Woolworths leader, Roger Corbett sit at the head of this new elite corporate entity, PrimeAg.

Not only will Wall Street, Macquarie Street and any other financial street control the food bowls of the earth, they will and are doing so with a much larger prize than food production in their minds and on their agendas. Whilst the drought was a welcome tool that came their way,

See **Despatch material re Weather WARFARE!**

a tool that is, has and will continue to send many a small family farming business to the wall making them easy pickings for the carrion of the wealthy, these financial elite have carefully seen that the rural sector have been excluded from the Carbon Trading scheme until they have absorbed all that is worth owning.

See **Despatch Material re "Green for Gold" & Global Warming Scams!**

What these financial carrion don't get, the radical green NGO groups amass. Vast tracts of quasi environmentally protected lands across this country and again, mostly with your politically sanctioned tax dollar grants, ensuring the people's Australia is removed from

public ownership. Not even your simple little house block belongs to you anymore as governments become corporatised and hence use the corporation's act to subvert the constitution. **An entire nation's people robbed of their very nation right under their noses.**

In 10, 15 years time when rural land is accepted for what it is, the most effective sequestration tool of CO2 and brought into the trading scheme scam, these global financial elite entities will own almost the entire nation in one form or another and the windfall in Australia alone to these carefully positioned sovereignty pariahs, will be in the billions of dollars, your dollars.

CEOs will reap their massive decadent rewards, wealthy investors will live in their palatial beach-front houses sipping gin & tonic on their dividends, **climate change will be renown as an historic fraud of the past** and millions of citizens will have become merely consumerist peasants world-wide and not long following, out will come the knitting needles, chaos and anarchy. ...Small business farming will be all but non-existent and cities like Sydney will be a seething metro-polis of a disaffected population under corporate governance. **The corporate colonisation of Australia will be complete, subjugation of its populace total. Not a shot fired.**

The movie, "Escape from New York" may have been fantasy then, but were the makers privy to more than we gave them credit for? From Brumby with 2Ys.

DESPATCH has access to a few copies of this

book for background info.

THIS LEAFLET IS AN INSERT FOR DESPATCH MAGAZINE VOL. 20:1. THE INFORMATION CONTAINED IN THE MAGAZINE EXPLAINING THE RELEVANCE TO AUSTRALIANS OF NAOMI KLEIN'S BOOK "THE SHOCK DOCTRINE" & THE 72 PAGE DOCUMENT BY SUE MAYNES, TITLED "TAKEDOWN AUSTRALIA" IS NEEDED TO COMPLETE THIS WARNING MATERIAL.

Extract: **Despatch vol.20:1 p.34**

"2. QLD is the " **BRIGALOW CORPORATION**".

Readers can clearly see that "private" land or property is not our own, and that the government is being run as a BIG BUSINESS....On 3rd October 2007 the ruling that 'fee simple' and the 'common law' are now no longer recognised in Queensland, and upheld by the High Court of Australia, means that we no longer have ownership or say in our land, and that Queensland is a separate entity [state] that can make its own laws..."

THE FOLLOWING TWO ARTICLES ADD BACKGROUND & CONFIRMATION TO DESPATCH ALERTS OF RECENT YEARS!

November 12th, 2007

(i) **The Privy Council admits the UK has no Jurisdiction in Australia.**

(ii) **AUSTRALIA is a corporation in corporated in 1973** - the Privy Council was NOT referring to the *land mass* Terra Australis here. **Website: www.homeownersrights.info./**

The **Foreign and Commonwealth Office** admits H. M. QEll is *Head of State of the UK* and has **NO** executive power in the Commonwealth of Australia.

(**Alan Gourley** an Australian Researcher stated in 1987, "**THE QUEEN SIGNED AWAY AUSTRALIA, 1986**": in his book "*Democracy & Treason in Australia*") www.despatch.cth.com.au

/Misc/gun310197.htm#QUEENSLAND.

Both of the above ENTITES (i) & (ii) are **corporate entities** and NOT the ORIGINAL Constitutional entities.

The Flesh and Queen Elizabeth the second is STILL the reigning Monarch over the **original de jure Constitutional Commonwealth of Australia** - the problem is that everyone has CONTRACTED

2 with the **foreign corporation known as AUSTRALIA and PARLIAMENT OF AUSTRALIA** - both are foreign entites FOREIGN to the original Constitutional Commonwealth of Australia government where NOBODY lives anymore. It still exists but **nobody is home**.

Australia the land mass and the Constitutional Commonwealth of Australia HAS NEVER BROKEN AWAY FROM THE ORIGINAL CROWN - rather the people have contracted into the foreign corporate entities known as "AUSTRALIA" & "PARLIAMENT OF AUSTRALIA" - both foreign corporate entities established in 1973 when the last vestige of money of substance ran out [*hence Whitlam not being able to "guarantee supply"*] which necessarily required that a foreign military [*but not obvious to the public*] takeover, take place.

This happened in 1973 as evidence by the fact that the words "**Commonwealth of Australia**" disappeared from the CURRENTCY. Also NO fault divorce IS NOT RECOGNIZED IN THE COMMON LAW - what does that tell you people? Think... think...thin....tick tock tock tick tock tick tock....think....

The UK High Court declared the UK Act to Constitute the Commonwealth of Australia 1900 is only of "historic interest".

Yes because NOBODY is living their lives according to common law principles therefore the original Constitution really does NOT apply to anyone anymore but it still exists and is still enforceable - just nobody home - all have contracted into the foreign corporations known as AUSTRALIA and PARLIAMENT OF AUSTRALIA - this was done **lawfully** through our **ignorance of the law** so there is no use whining and complaining about *Constitutional Trial By Jury* as the judges CANNOT reinstate this

even if they wanted to until the people go back to using **money of substance** which means they automatically fall back under the original Constitution.

The Privy Council admits there have been NO Orders in Council for the appointment of Australian Governors-General.

AUSTRALIAN - means the corporation known as AUSTRALIA and GOVERNOR GENERAL is just an executive office of that foreign corporation known as AUSTRALIA which was established in 1973 when the final vestiges of **money of substance** was REMOVED out of circulation hence Whitlam not being able to "guarantee supply" and the NECESSITY therefore for a new government to take over - the rest was just a dog and pony show. ...

That is more than enough for starters - hopefully some people see the reality that I have listed here in.

Yours sincerely,

John Wilson.

Australia Is Just AN ACN Number

www.sosnews.org
/newsfront/?p=56#more-56

Australia Sold As the Corporate colonisation of rural Australia gains ever increasing momentum, there is a need for us all to consider what this may possibly mean for our, and our children's futures.

With a world moving forward at an alarming pace of unfettered free trade, removing any and all barriers to a Nation's sovereignty, the global financial corporations are exponentially absorbing the real wealth of the world into their portfolios, land. Mineral and hydrocarbon exploitation has reached the point of envisaged saturation and what's left of these 20th century billionaire making

commodities, **is only within the grasp of the MAJOR GLOBAL CORPORATIONS**.

The global corporate gurus have been working furiously over the last few decades to indoctrinate the masses, direct and control the world's environmental movements and manage western governmental legislation into a position that situates the elite at the sales counter of the ... creek paddle shop department of, screwed over landholders, manufacturers and intellectual rights owners selling out here.

Australia is a perfect show case of the EFFICIENCY of this global movement, with the frosted window into the machinations of global corporate colonisation starting to quickly demist.

So what is it about corporate colonisation that we should all be aware of, city and rural folk alike, and decide as a collective of once democratically free people if we really want to live under a one-world corporate governance? ...

The future wealth of the world's elite will orbit around energy, food, water and trading in CO2, with the latter being the bogeyman of the present, but in reality a smoke screen to not only cover the legions of the wealthy financial elite's advance, but to generate trillions from the public purse to finance the advance. The very people who own the purse are funding their own social demise. You and me.

Australia is seeing an unprecedented buy up and projected buy up of vast rural holdings, not from the current rural farming stock, people with experience and patriotism, but from within the financial market places, both here and internationally.

Our Major abattoirs are partially foreign owned. There's a story here that we will do as a special.

The new players on the field

across the board in many instances are³ at the very least, foreign backed. The money is coming out of the disposable investment funds of the wealthy, people that have no link, nor interest in the land, other than the dividend that may accrue each financial year, or at the stock exchange trade.

The corporate managers are financial traders, not farmers. They are businessmen and lawyers that see that much wealth is able to be amassed from a corporate farming scheme that controls all, from the paddock to the plate, whilst steering the legislative imposts.

The Woolworth's effect if you like.

Economies of scale are being force driven by the global funds of the elite moving about the world feeding from the hard work of the last 100 years of the citizens of nations that have had their borders, tariffs and barrier protections breached and their sovereignty watered down to the point that it is almost non-existent.

This is **SOCIALISM** when you are NOT having **socialism** and is a very short-lived process of **COLONIALISM** that can only END in disaster. Just take a look at Europe and ask the masses of unemployed, lower paid, if they really enjoy their no border control, one world euro change. Ask our own Australian factory workers how living on the dole, or part time work satisfies their needs to see their children fed and educated while China and the like provides slave labour to international corporate pariah manufacturing.

With water being fought over at every level of society in Australia today, it is only time that stands between God's nectar being free and corporate ownership of the rain, with even now, State Governments paying market prices with our tax dollars for water to be delivered to the environment at the expense of
